

WHY ARE THE BEES DISAPPEARING? MANY ENVIRONMENTAL FACTORS HAVE BEEN SUGGESTED BY RESEARCHERS AND OBSERVANT BEEKEEPERS. EMF FROM POWER LINE AND BROADCAST SOURCES HAS BEEN DEMONSTRATED TO INTERFERE WITH NAVIGATION, ORIENTATION, AND WELLBEING. THIS MAP OFFERS LINKS TO ARTICLES, CONCERNED ORGANIZATIONS AND DOCUMENTS ON THE TOPIC.

BEES AND EMF: THE PRICE OF INACTION

"...almost every action we undertake has some direct or indirect effect on the environment in general, and on biodiversity in particular."
Chivian, Bernstein et al

- BEE SYMPTOMS**
- Reduced egg laying
 - Disturbed homing
 - Stillness
 - Confusion
 - Slower traveling
 - Smaller honeycombs
 - Reduced honey-storing
 - Increased free radicals
 - Disturbed scent memory
 - Impaired learning processes
 - Weakened immune system
 - Disturbed antenna communication
 - Infuriated by handset signaling
